

## **Maureen CARTHY PSQA**

I consider myself a Fine Arts Photographer, and as such seek beauty and visual impact in my work and I have a soft spot for black and white.

Years ago, I acquired an Associate Diploma of Art and Applied Photography, when great images were made in the dark with the lingering smell of darkroom chemicals.

For me it is all about finding joy in your photography, it is the one thing you can do that allows you to leave the real world behind. I am the first to say follow your dreams with a camera in hand and record those everyday events that bind our families and communities together.
